

SALOMON

SNOWBOARDS

WELCOME IN

It doesn't matter if you're after bottomless pow fields, perfect groomers, sunny terrain parks, or all of the above.

If you're reading this you're one of us; and we're really glad you're here.

Designed by snowboarders and approved by our world class team, Salomon products are built to make every slash, every side hit, and every single day on hill more fun than the last.

SALOMON SNOWBOARDS.

PLAY MINDED PROGRAM

committed to play responsibly

Initiated in 2017, the Play-Minded Program addresses the company's immediate and long-term objectives and intentions in several areas relating to operating a more sustainable business. With a focus on educating outdoor enthusiasts, the company has outlined a plan with 9 objectives through 2025 that focuses on grassroots efforts to support the people and places of the outdoor sports community. In addition, Salomon has taken a number of recent actions to immediately reduce the company's impact on the environment.

The Salomon Play-Minded Program has four key areas of focus: the Toys (the products themselves); the Playmakers (the people who create the toys we use to play outdoors); the Playground (the places where we practice these sports); and the Players (the people who make up the communities of our outdoor sports).

2025 OBJECTIVES

100% of supplier environmental and chemical compliance
100% of environmental product performance visible to the consumer
100% of new products part of circular economy

Ranked in top 25% of companies in employee engagement
2,5% of payroll on training & development
100% of supplier social compliance
70% of operations waste recycled/reused

Invest 1% of annual revenue to educate players

30% reduction of carbon emissions by 2030

OUR ACTIONS AT SALOMON SNOWBOARDS

ETHICAL POLICY

We've established criteria and tools for environmental responsibilities, based on continuous improvement of performance by monitoring and controlling the impacts linked to our in-house activities, such as chemical safety, waste and wastewater. Social Compliance Policy defines how we conduct a supplier monitoring program on documentation, labor laws, compensation, discrimination, and many other recognized social principles to ensure the safety and well-being of playmakers.

CULTIVATING SNOW SAFETY AWARENESS

With a focus on outdoor enthusiast education, we've partnered with Victor Daviet's Safety Shred Days and Salomon's Mountain Academy.

CHARITY

As we continue to advance in sustainability measures and ethical policies within our organization, we also look outward, focusing on social responsibility directed towards players who don't have access to resources and playgrounds. We've partnered with Riders for Refugees and Snow Days, along with other local organizations in an attempt to lower the barriers to entry for the sport we love. This is an ongoing process, we are dedicated and will continue to look for ways to increase equity in our sport.

We are committed to promoting the well-being of our players and teams through positive impacts on our playgrounds, partners, and future players.

BOARDS

40 000 plastic bags not produced in 2020

40% reduction in petroleum based materials via ABC wrapper

More bio-sourced materials for innovation through sustainability

With decades of powder riding and a profound expertise in shaping boards, Wolle Nyvelt has developed a refined process for creating prototypes, utilizing rider feedback and focusing on craftsmanship using the finest materials. The Hillside Project Series is a continuous pursuit in the development of authentic powder shapes, designed to reflect diversity in terrain, snow, and riding style. This is our vision of powder riding.

“It was super cool to work directly with Wolle. I have so much respect for his riding and shaping capabilities; I knew that he would be able to take my notes, and translate them into the best possible board for the hybrid snowboarding I want to do. I’m very happy with the outcome”

HPS - LOUIF PARADIS

415146

Louif describes his riding as hybrid, often combining elements of powder and manufactured structures, blending both street and freeride skills. Using his shaping expertise and Lou’s critical feedback during the proto process, Wolle created this tapered directional board built for freestyle tactics in deep terrain, satisfying Lou’s hybrid demand.

SICKSTICK

415048

The SICKSTICK, tried-and-true and tested by time and endless riders—an instant classic upon its inception over 10 years ago. Designed by Wolle Nyvelt, this tapered twin turns 6-inch days into 12-inch days and makes riding switch in pow a breeze. Sustainable bamboo and cork components offer a lively, nimble ride, while reducing weight and waste.

HPS- WOLLE NYVELT

415080

In collaboration with and designed by team rider and founder of Äsmo Pow Surfers, Wolfgang Nyvelt. This pow board is directly based on Äsmo board concept and specs. Wide for float, but responsive edge-to-edge, the shape crafted by Wolle allows the riders stance and body to be perfectly balanced for supreme pow riding performance.

TOM HEGEN x SALOMON

Both for their name and intended riding styles, the SUPER8 and BELLEVUE call for a specific visual approach: combining art, technology, and natural resources. For this year, we've teamed up with German photographer Tom Hegen, who highlights the relationship between humans and nature. In his work, Tom largely focuses on landscapes that have been dramatically transformed by human intervention. As snowboarders we relate to this message concerning the environment. Both internally, and while we're making turns in the great outdoors. We're always conscious of the trace we leave behind and determined to limit our impact on nature.

PILLOW TALK

415055

The Pillow Talk draws on inspiration from classic shapes like the Sick Stick, designed specifically for the ladies. Built with Rock Out Camber for float in pow and versatility in all conditions, this tapered twin turns 6-inch days into 12. Popster core and Ghost Basalt stringers keep things lively and natural underfoot for big energy all season.

When it comes to this catalog you are holding, we printed it because we absolutely needed to for our business. So when you're done using it we urge you to properly recycle it!

Unless of course you are a proud collector of seasonal Salomon Snowboard catalogs, in which case we salute you!
