SALOMON

Transforming skiing since 1947

Trends change, technologies do too, sports and outdoor activities evolve. Occasionally, whole industries are redefined by a seemingly small change that quickly becomes so pervasive that it seems impossible there was ever a time “before”.

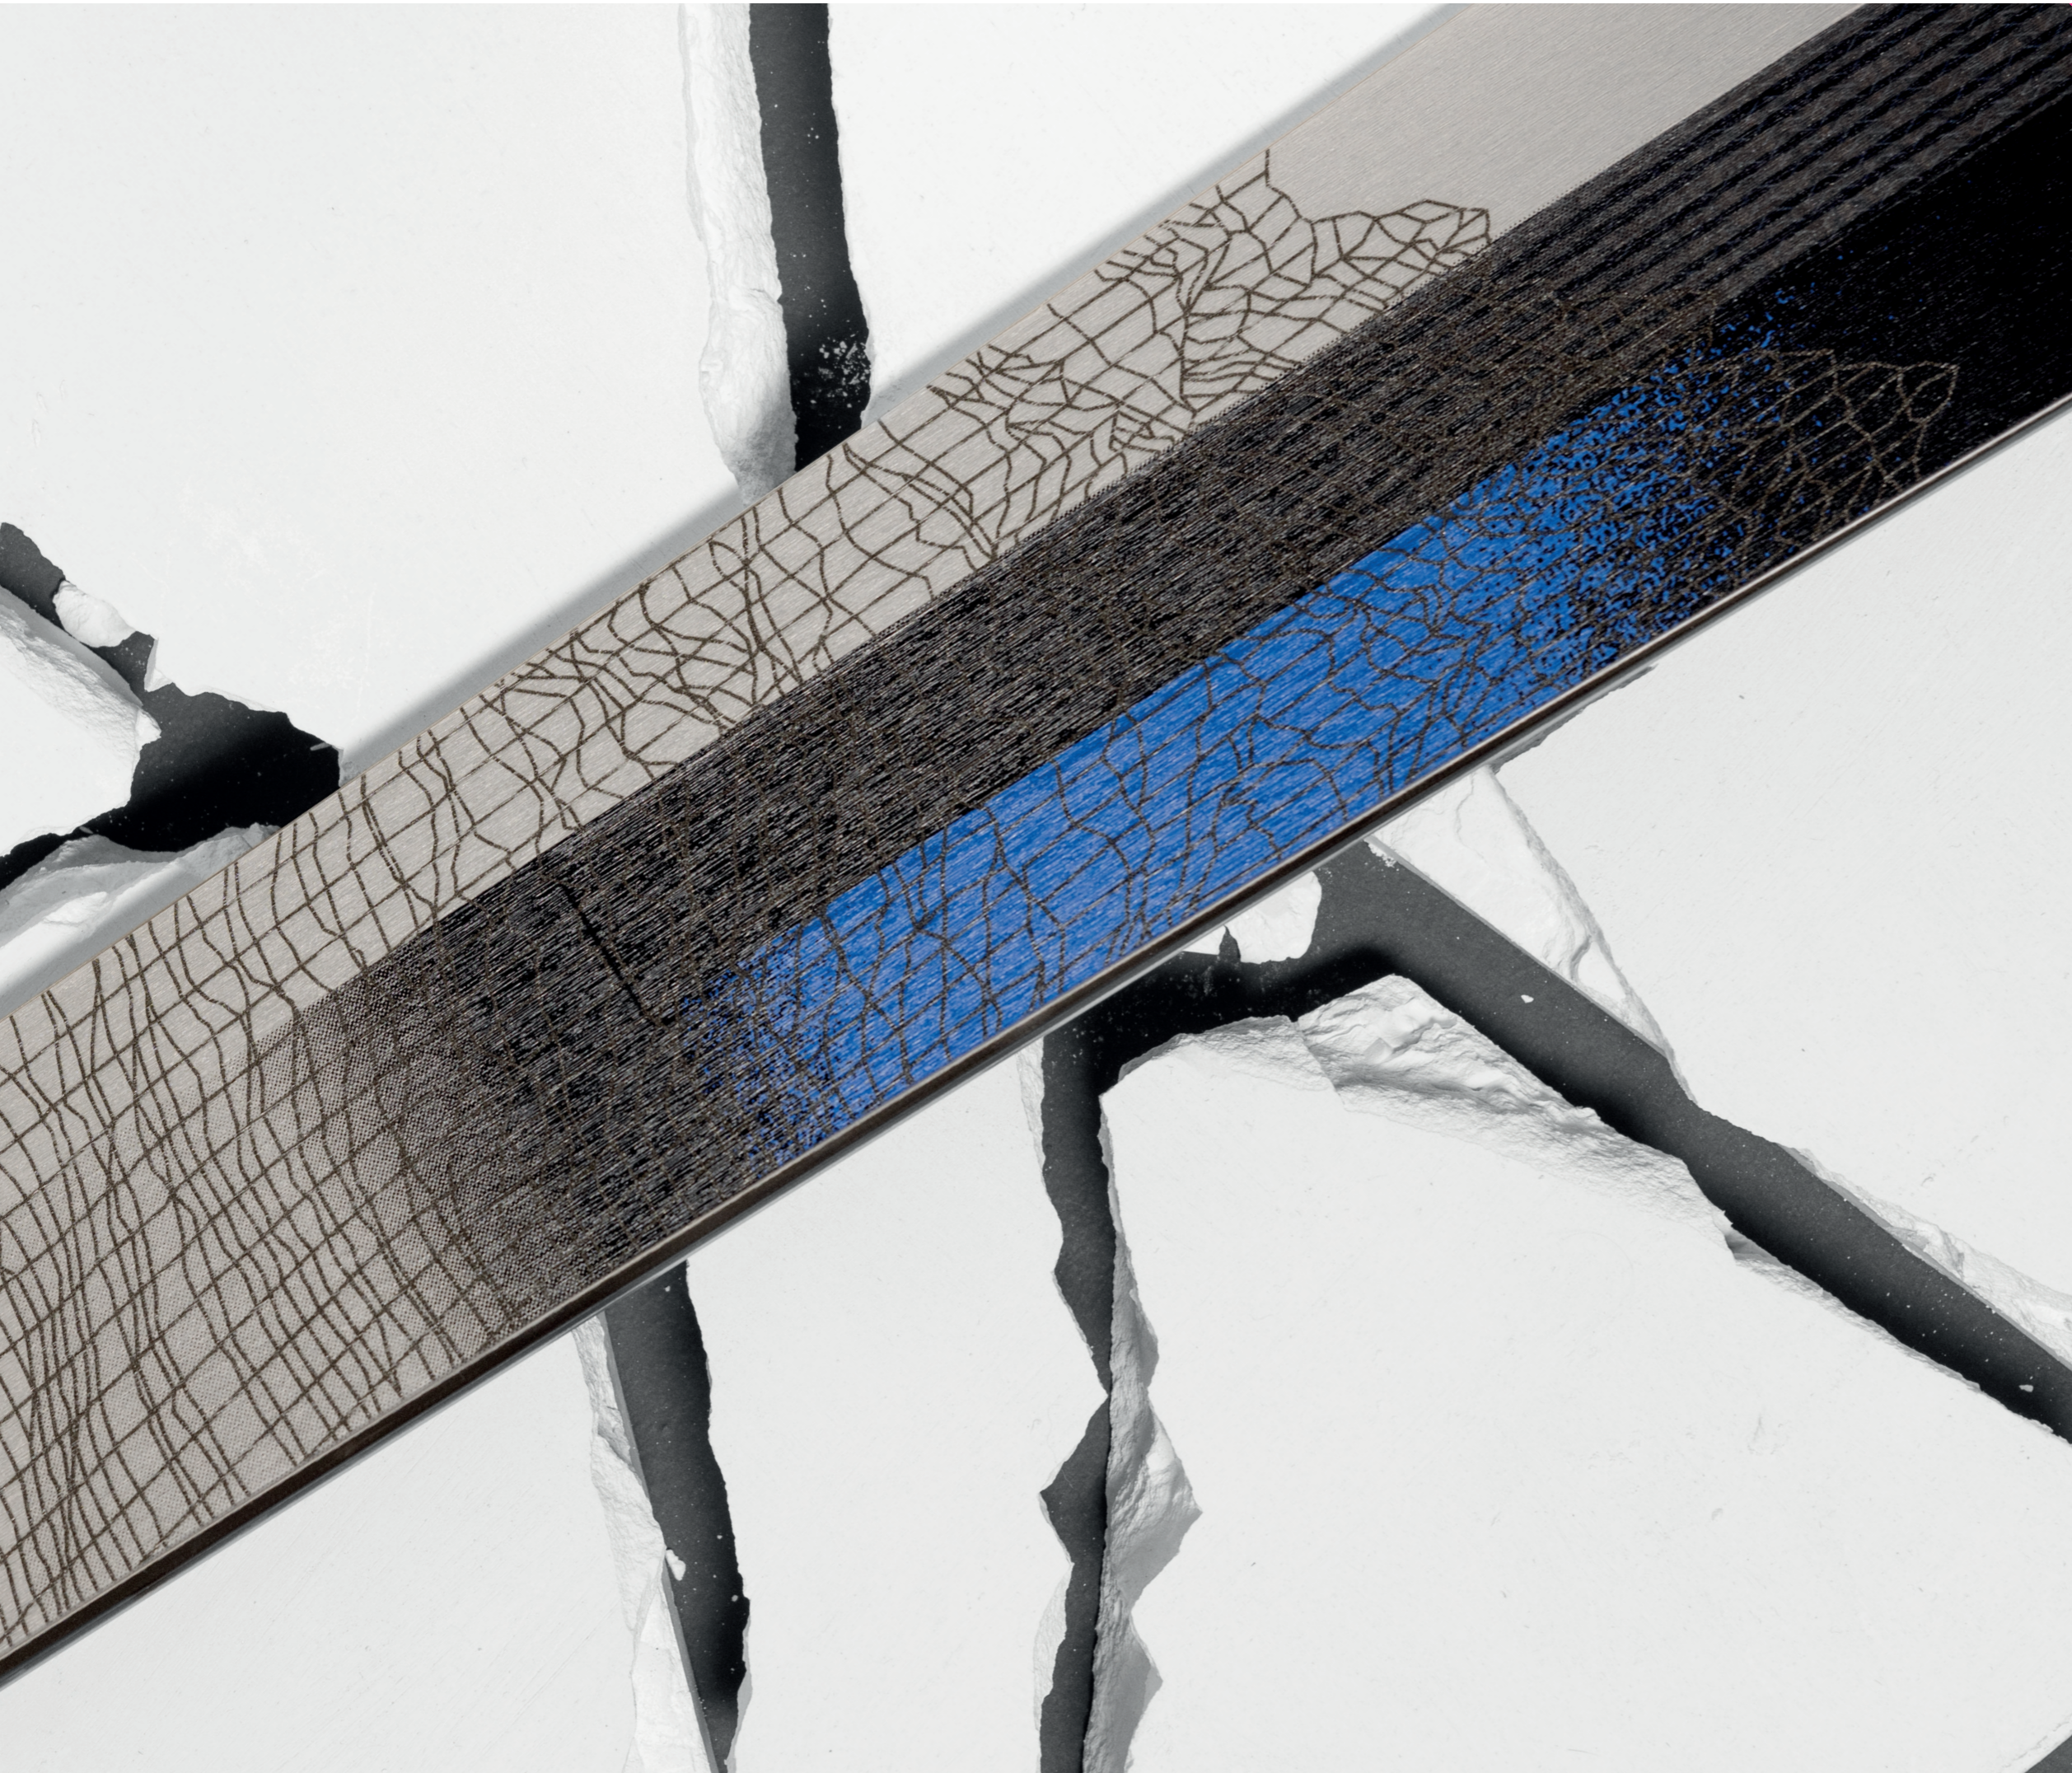

Steel edges, self-releasing heelpieces, forward-flexing ski boots... all born from the passion, engineering, and innovation of a company fascinated by the outdoors. Our innovation has been driven by generations of athletes, ambassadors, developers, and behind-the-scenes experts working tirelessly to advance the practice of our favorite sports and offer an opportunity for people to be their best selves.

To some, 1947 and 2023 are just years, to Salomon they mark a 76-year-long dedication to innovation and excellence. In Ancey we have been dedicated to inventing tomorrow since 1947 and continue to be excited about shaping the future.

“What fascinates me the most is what I will do tomorrow.” George Salomon said it and the Salomon family continues to live by it.

SALOMON

TOMORROW IS YOURS

ALPINE SKIS

QST ECHO

LIGHTWEIGHT CONSTRUCTION. TRUSTED PERFORMANCE.

You asked, we answered: a touring-specific evolution of the iconic QST line. The QST Echo 106 combines a karuba/poplar core, superlight basalt fibers, and cork dampifier, for a lighter, livelier, go-anywhere backcountry ski. We kept the 106mm waist to rally in all conditions, while raising our commitment to sustainability with recycled materials..

ULTRALIGHT CORE & CONSTRUCTION

A featherlight karuba/poplar core combined with basalt fibers and cork dampifier in the tip and tail result in a lightweight ski that excels on the uphill.

CONFIDENCE-INSPIRING RIDE

Cork dampifier in the tip and tail combined basalt fibers throughout offer stability at speed, while the karuba/poplar core creates a lively and responsive ride.

A MOVE TOWARDS SUSTAINABILITY

The QST Echo 106 is made from 30% recycled topsheet materials and 100% recycled ABS in the double sidewalls, for a step towards a more eco-friendly ski.

STANCE

CRAFTED TO CHARGE.

LIVELY & RESPONSIVE

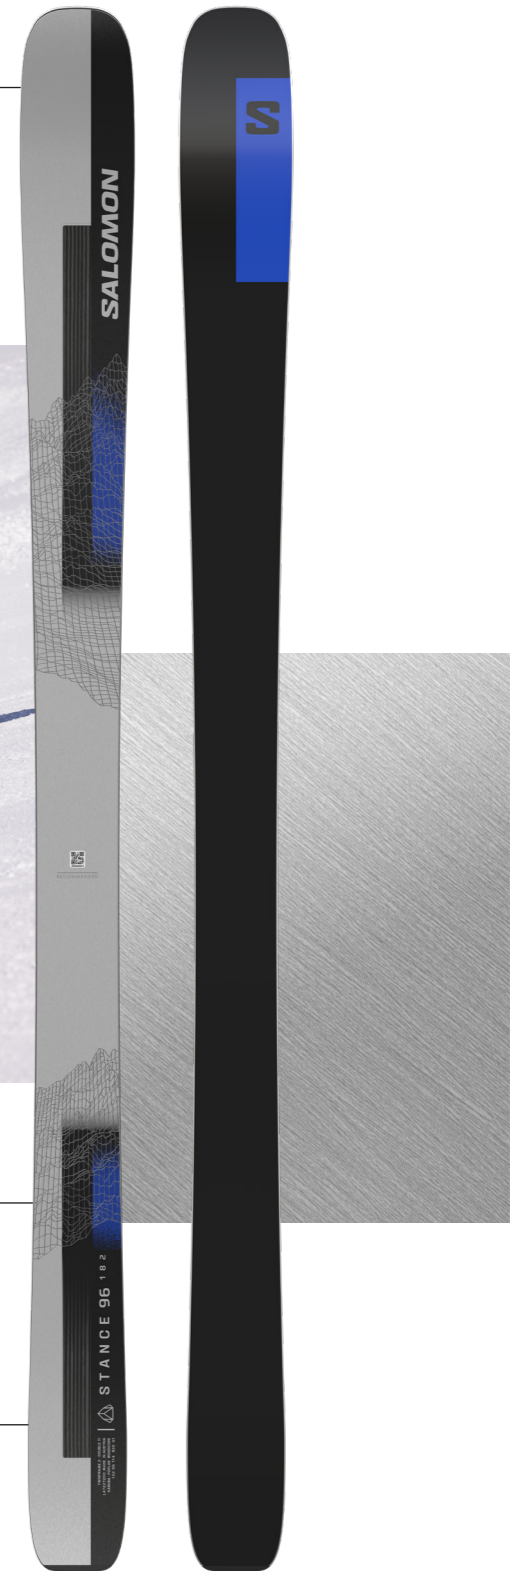

A new karuba/poplar woodcore combined with a redesigned titanal frame and all-mountain rocker profile offer finesse and agility to this redesigned ride.

SUPERIOR EDGE HOLD

Full sandwich sidewalls plus Twinframe² construction create confidence-inspiring edge grip on and off piste.

ALL-MOUNTAIN VERSATILITY

We've redefined "all-mountain" with a new metal chassis, and a dynamic wood core to create a ski that will take you anywhere from groomers to glades - with confidence.

ALPINE BINDINGS

NEW **MTN SUMMIT 12 BR**
L47327200+

Flawlessly balanced weight, performance, and reliability for daily touring.

Perfectly balancing lightness, performance and reliability, Salomon's MTN Summit bindings elevate your alpine touring experience and make it to step in no matter the terrain. The heel ramp increases stability and edge grip, while keeping the breaks easy to remove, and the Flex-absorption system optimizes ski-flex for more fun with less effort.

S/LAB SHIFT 13 MN

L41130400+

Uphill freedom plus downhill power equals zero compromise.

The new S/LAB SHIFT MNC 13 binding ushers in the next generation of freeride capability, blending the touring efficiency of a pin (low-tech) binding, with the performance of an alpine freeride binding. For skiers who like to push the boundaries of the mountain and their skiing, SHIFT to the first ever truly compromise-free binding.

STRIVE

**LOW PROFILE DESIGN.
HIGH PERFORMANCE CONSTRUCTION.**

The Strive 16 features an ultra low-profile toe piece which creates a low center of gravity. This enhances a skier's power, control, and response due to enhanced sensitivity. The binding lets the characteristics of the ski and slope excel, creating a better day on skis.

POWER & STABILITY
A wide (72mm) AFD pad, gives skiers extra contact between boot and binding. This adds stability and increases power transfer from binding to ski.

RESPONSIVENESS & CONTROL

An unrivaled 47mm of elasticity builds confidence and security at speed. The low-profile toe piece creates a low center of gravity, providing an unmatched on-snow feel.

SKI & BINDING INTEGRATION

A low center of gravity creates unmatched ski-to-snow connectivity. Enhanced sensitivity equals quicker reaction, heightened control, and a better day on skis.

ALPINE BOOTS

MTN

UNMATCHED FUNCTIONALITY FOR THE UP. MAXIMUM PERFORMANCE FOR THE DOWN.

Salomon's S/LAB MTN SUMMIT boots strikes the perfect balance between the lightness needed to effortlessly go up, and the reliable performance required to ski down. The ultra-light Ultramid® Shell, 70 mm wide Dual Powerstrap and thin liner deliver the precise calf-wrapping and consistent tightness needed to conquer even the most extreme routes.

DOWNHILL PERFORMANCE

The Carbon spine creates a super-strong shell-to-cuff connection, so you experience the consistent, powerful flex needed to ski down the steepest terrain with confidence.

PRECISION

The micro-adjustable BOA® Fit System combined with a strategically placed ankle strap creates Salomon's innovative Touring Belt, for a customized fit and unbeatable heel-hold.

TOURING EFFICIENCY

Weighing exactly 1,050 kg and with a 75° range of motion that will help your foot effortlessly maintain its natural rolling motion, this boot makes hiking up as easy as it gets.

S/PRO ALPHA

ALPINE BOOTS ALPINE S/PRO ALPHA

PREMIUM PERFORMANCE. UNRIVALED FIT.

We crafted the S/Pro Alpha 130 EL in collaboration with the world's best boot fitters. Together we developed the innovative 3D Instep Shell Construction, delivering unmatched foot hold for precision, control and performance in a 98 mm last. Then we upped the ante on customization by pairing Custom Shell HD with Custom Tongue for next generation comfort and fit. #FirstinFit

CUSTOMIZABLE FIT

The dismantlable, 2-part, fully customizable tongue and CustomFit 4D liner with thermoformable Talyn® make it easy to adapt the instep and fit to the uniqueness of your feet.

OUTSTANDING FOOHOLD

The new 3D instep shell and 45° placement of the 2nd forefoot buckle ensure you can enjoy a stronger heel lock and more homogeneous foothold whatever your instep height.

FLAWLESS INSTEP

The thinner plastic and strategic positioning of the 2nd lower shell buckle put less pressure on the top of your foot and make it easier to step in and out of your boots.

S/PRO SUPRA

THE NEXT DIMENSION IN FIT.

Engineered to advance foothold and performance by challenging traditional boot constructions, Salomon's Supra BOA 120 ski boots outline a new standard of perfect fit. Our ExoWrap® Construction, combined with a weaved Alpine Boa buckling system, offers more harmonized foot-wrapping, so you can easily re-dial your fit and performance through the day.

MORE CONTACT, BETTER FIT

Strategically placed thinner-shell walls, Alpine Boa dial, cable and guides increase the number of tightening points on the forefoot, for a more precise fit.

PRECISE FOOT WRAPPING

The ExoWrap® construction, Alpine Boa system, and latex-foam liner with elastic belt allow for a more rounded shell deformation and more precise wrapping of your feet.

ACCURATE SKI-STEERING

The mix of a Custom Tongue and ExoWrap® construction delivers precise foothold so you can achieve effortless ski steering on any slope.

 Brigade L.47257600 / Sentry Prime L.47249200

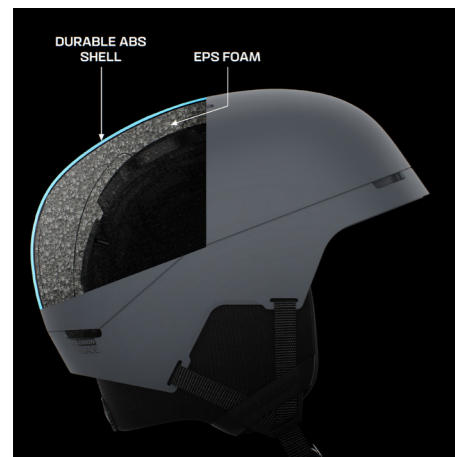

HELMET TECHNOLOGIES

1 CONSTRUCTIONS

Injected ABS

› ROBUSTNESS AND DURABILITY

Made from a single injection of ABS beads, this construction delivers high durability, shock absorption, impact deflection and resistance to penetration.

In-Mold

› COMFORT AND LIGHTNESS

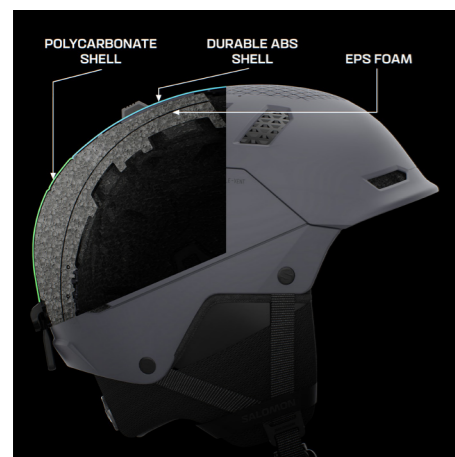

A performance benchmark for many years, the In-Mold construction fuses a lightweight polycarbonate shell with an EPS liner to maximize protection and comfort.

Hybrid

› PERFECT COMBINATION OF PROTECTION AND LIGHTNESS

The hybrid helmet construction pairs a tough injected ABS upper shell with a lightweight In-Mold lower shell, combining the best of both worlds into a lightweight and durable helmet.

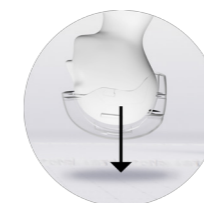

2 SAFETY

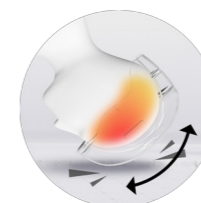

Mips

› BRAIN PROTECTION

The low-friction layer allows for a 10-15 mm multi-directional movement of the head on certain angled impacts, intended to reduce rotational force shocks to the brain.

1. Traditional helmets are designed and tested for straight impacts, but most impacts are angled, which can cause rotational motion to the head.

2. The rotational motion can cause brain injuries.

3. The Low Friction Layer is intended to help reduce the rotational motion to the head in certain angled impacts.

twICEme

› PROVIDES SAFER ADVENTURES

twICEme is a technology integrated in some of our helmets, allowing for more efficient emergency responses in case of an accident. twICEme is read by placing an NFC-enabled smartphone on the twICEme symbol. twICEme gives instant access to uploaded information such as medical information, ICE contacts, personal identifiers, insurance info and exact coordinates.

Smart Safety (360°)

› OUTSTANDING PROTECTION

Low density EPP inserts, strategically placed inside the helmet, improve shock absorption. The classic Smart Safety technology protects the frontal and occipital areas, while Smart Safety 360° provides all-around protection for your head.

EPS4D

› BETTER SHOCK REPARTITION

The traditional EPS structure is hollowed out to create pads that absorb an additional 30% of shocks without impacting the complete structure of the helmet. This also improves ventilation by creating air channels and reduces the amount of material used, lowering the helmet's environmental impact.

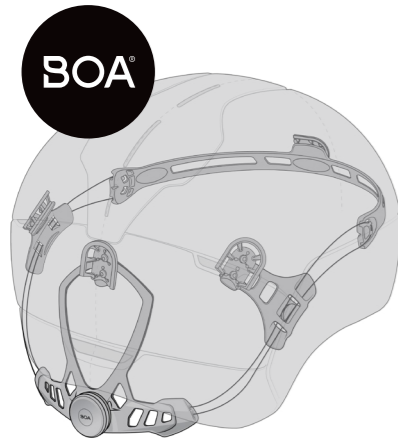

3 FIT

BOA®

› MULTIDIRECTIONAL PRECISION FIT

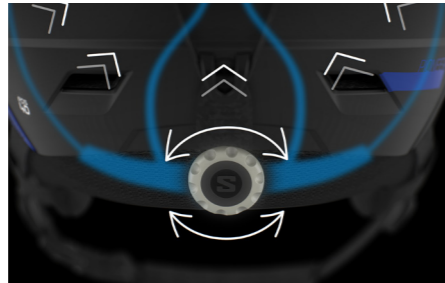

The lightweight and low-profile BOA® Fit System seamlessly integrates with helmets to create a custom, micro-adjustable fit for all-day performance.

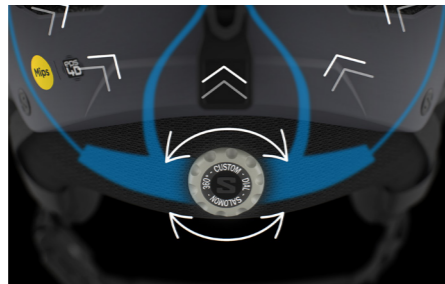

Custom Dial (360 V)

› SIMPLE FIT ADJUSTMENT

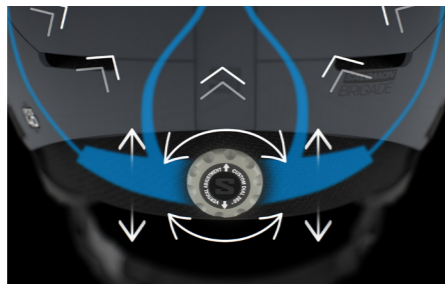

The Custom Dial provides added versatility and a more fine-tuned adjustment to the helmet. Whether on the back of the head only, all around it or with an additional vertical adjustment, it allows a tighter fit and perfect stability. Just loosen the knob for a more relaxed fit.

Custom Dial

Custom Dial 360

Custom Dial 360 V

MaxFit construction

› FITTED FOR INSTANT COMFORT

The MaxFit construction, located around the ear pads, offers instant comfort and better-quality hearing.

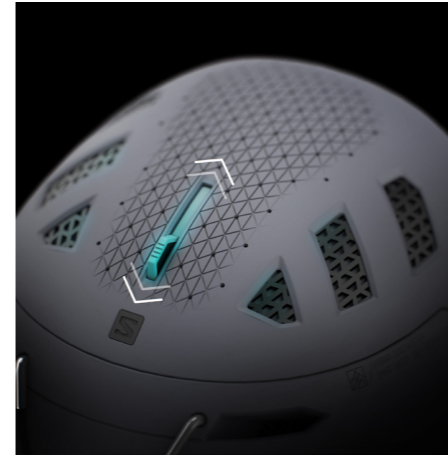

4 VENTILATION

Adjustable ventilation

› AIRFLOW CONTROL

Adjustable and easy to use, this ventilation system allows you to modify the amount of airflow and heat exhaust, even with gloves on.

Airflow concept

› KEEP YOUR HEAD COOL

Combining strategically positioned openings on the helmet's shell and the EPS4D liner with built-in channels inside it, we ensure an even temperature and constant airflow between your head, your helmet and your goggles.

5 OTHER FEATURES

Fidlock®

› FUSS-FREE SECURE FASTENING

The magnetic Fidlock® buckle ensures single-handed and fuss-free secure fastening.

Eco-friendly fabrics

› MERINO

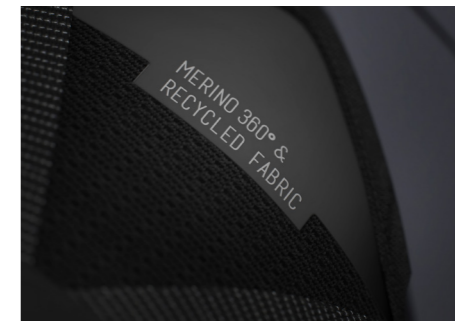

Natural and breathable material

A natural, comfortable and fast-drying liner that is easy to remove and wash.

› RECYCLED FABRICS

Comfortable and environmentally friendly

Liners made from recycled soft fabrics, comfortable on your head, and friendly to the environment.

SIGMA™

Sigma™ is Salomon's innovative lens solution that significantly amplifies color contrast on snow, enabling the eye to instantly read terrain variations.

A high-contrast lens cannot perform at its best in all types of environments. That's why Salomon's Sigma™ lens was specifically developed to better interpret snowy terrain.

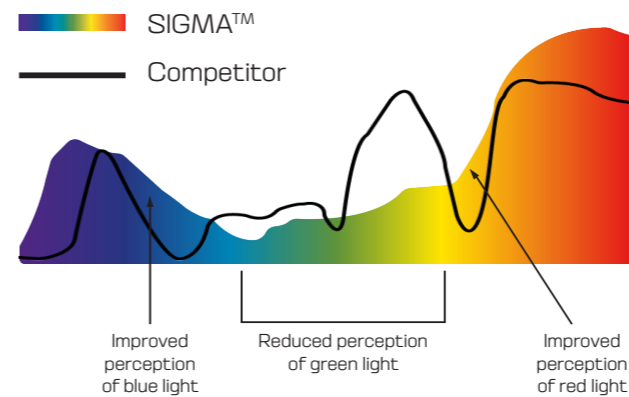

The eye is made up of blue, green and red cones that detect different colors of light. But in a snowy environment, white light reflected from the snowy triggers all three cones and makes it hard to see detail.

Sigma™ lenses reduce the green light in the middle of the spectrum, therefore boosting the blue and red light transmitted. It offers less confusion between these 2 colors, so the snow appears sharper, with more clarity and detail.

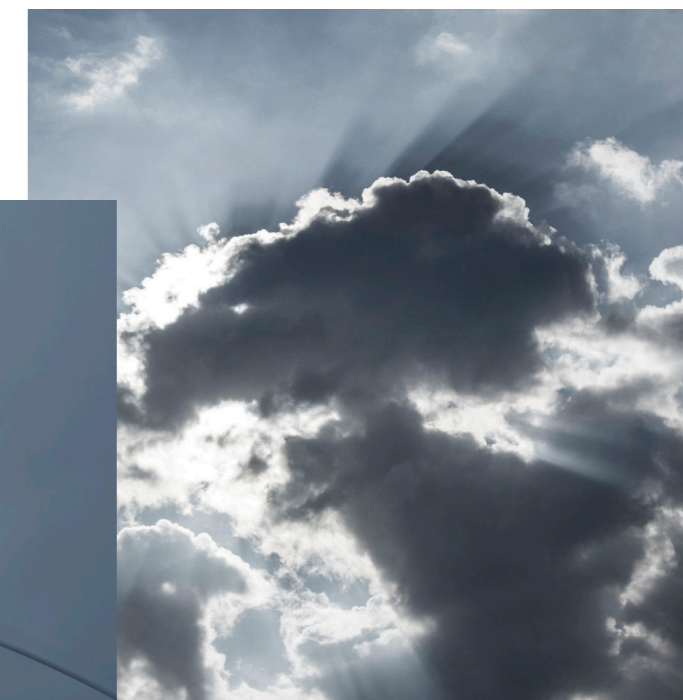

REGULAR YELLOW LENS

SIGMA™ LENS

Available in category 3, 2, 1 and photochromic 1 to 3, Sigma™ lenses are the perfect solution for premium vision whatever the light conditions.

LENS TECHNOLOGY

1 PHOTOCROMIC LENS

› **ULTIMATE ADAPTABILITY**

Photochromic lenses respond to changing light conditions by automatically darkening or lightening depending on the amount of UV rays emitted by the sun.

With the Sigma™ and multilayer category 1 to 3 photochromic lenses, Salomon provides you with premium vision whatever the light conditions.

2 MULTI-LAYER

› **STYLE AND PERFORMANCE**

A multi layered mirror finish increases protection from glare and reduces eye fatigue. It also combines style and performance with a variety of colors.

3 FLASH

› **SUBTLE COMFORT**

A subtle mirror coating with only a blush of reflectance helps reduce the overall brilliance of sunlight on snow.

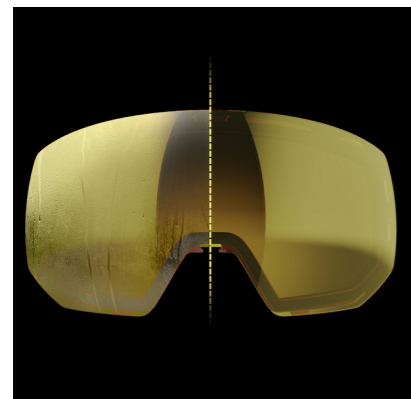

4 ANTI FOG

› **CRYSTAL-CLEAR VISION**

All our goggles have a double lens construction. Just like double glazing, this insulates the inside lens, stopping it from getting too cold, and fog forming on the inside. Also, to reduce the humidity on the inside, all our goggles feature 360 degree ventilation to allow free flowing air movement.

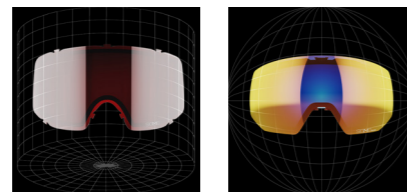

Finally, all lenses are treated with a specific coating which makes them more resistant to fogging.

5 SPHERICAL VS CYLINDRICAL

› **BETTER FIELD OF VISION**

Cylindrical lenses are designed on a base curvature on the X axis (horizontal), they follow the curve of the face, offer a good field of vision and reduce optical distortions. On the other hand, spherical lenses are designed on both X and Y axes (horizontal and vertical). This gives them a more rounded shape which maximizes vertical and horizontal peripheral viewing angles for a better quality of vision.

6 100% UV CUT

› **ZERO COMPROMISE ON PROTECTION**

All Salomon lenses filter out 100% of the sun's UV rays for complete eye protection.

FRAME TECHNOLOGY

1 INTERCHANGEABLE LENS SYSTEM

Magnetic

› **EASY AS ABC**

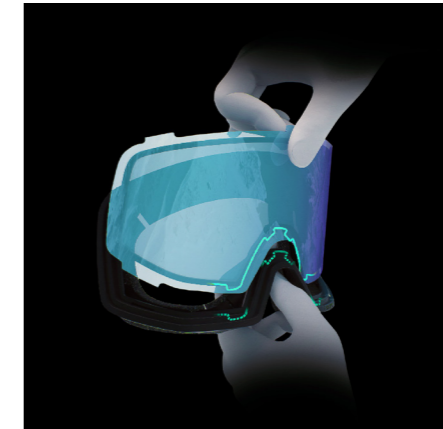

Sixteen strong magnets are strategically positioned to hold the lens securely in place, while rubber grips allow for it to be removed without smudging.

Mechanical system

› **READY FOR ANY WEATHER CONDITIONS**

To help you switch from a lens to another, we make sure Salomon's interchangeability system is simple to use.

2 CUSTOM ID FIT

› **PERSONALIZED COMFORT**

Adaptive foam and frame complexes offer an advanced, anatomical fit no matter the shape of your face.

3 OTG

› **FOR PRESCRIPTION GLASSES WEARERS**

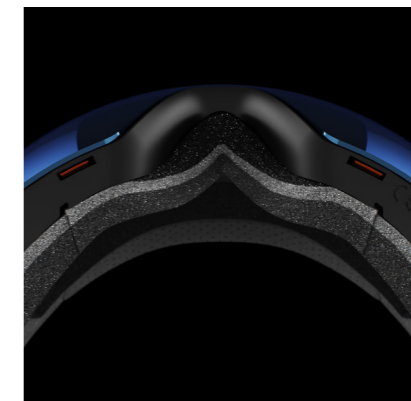

A comfortable shape perfectly fits over prescription glasses, reducing fogging thanks to improved airflow around the eyes.

4 ASIAN FIT

› **THE BEST FIT FOR ASIAN FACES**

Developed to best fit Asian face physiognomy, these goggles feature revised foam lining thickness at the nose bridge.

5 CE NORMS

› **EN 174-2001 COMPLIANT**

All Salomon goggles, whatever their color, are compliant to the standards required by the EN 174-2001 norm.
